

BRENNAN POTTERY CLAMP

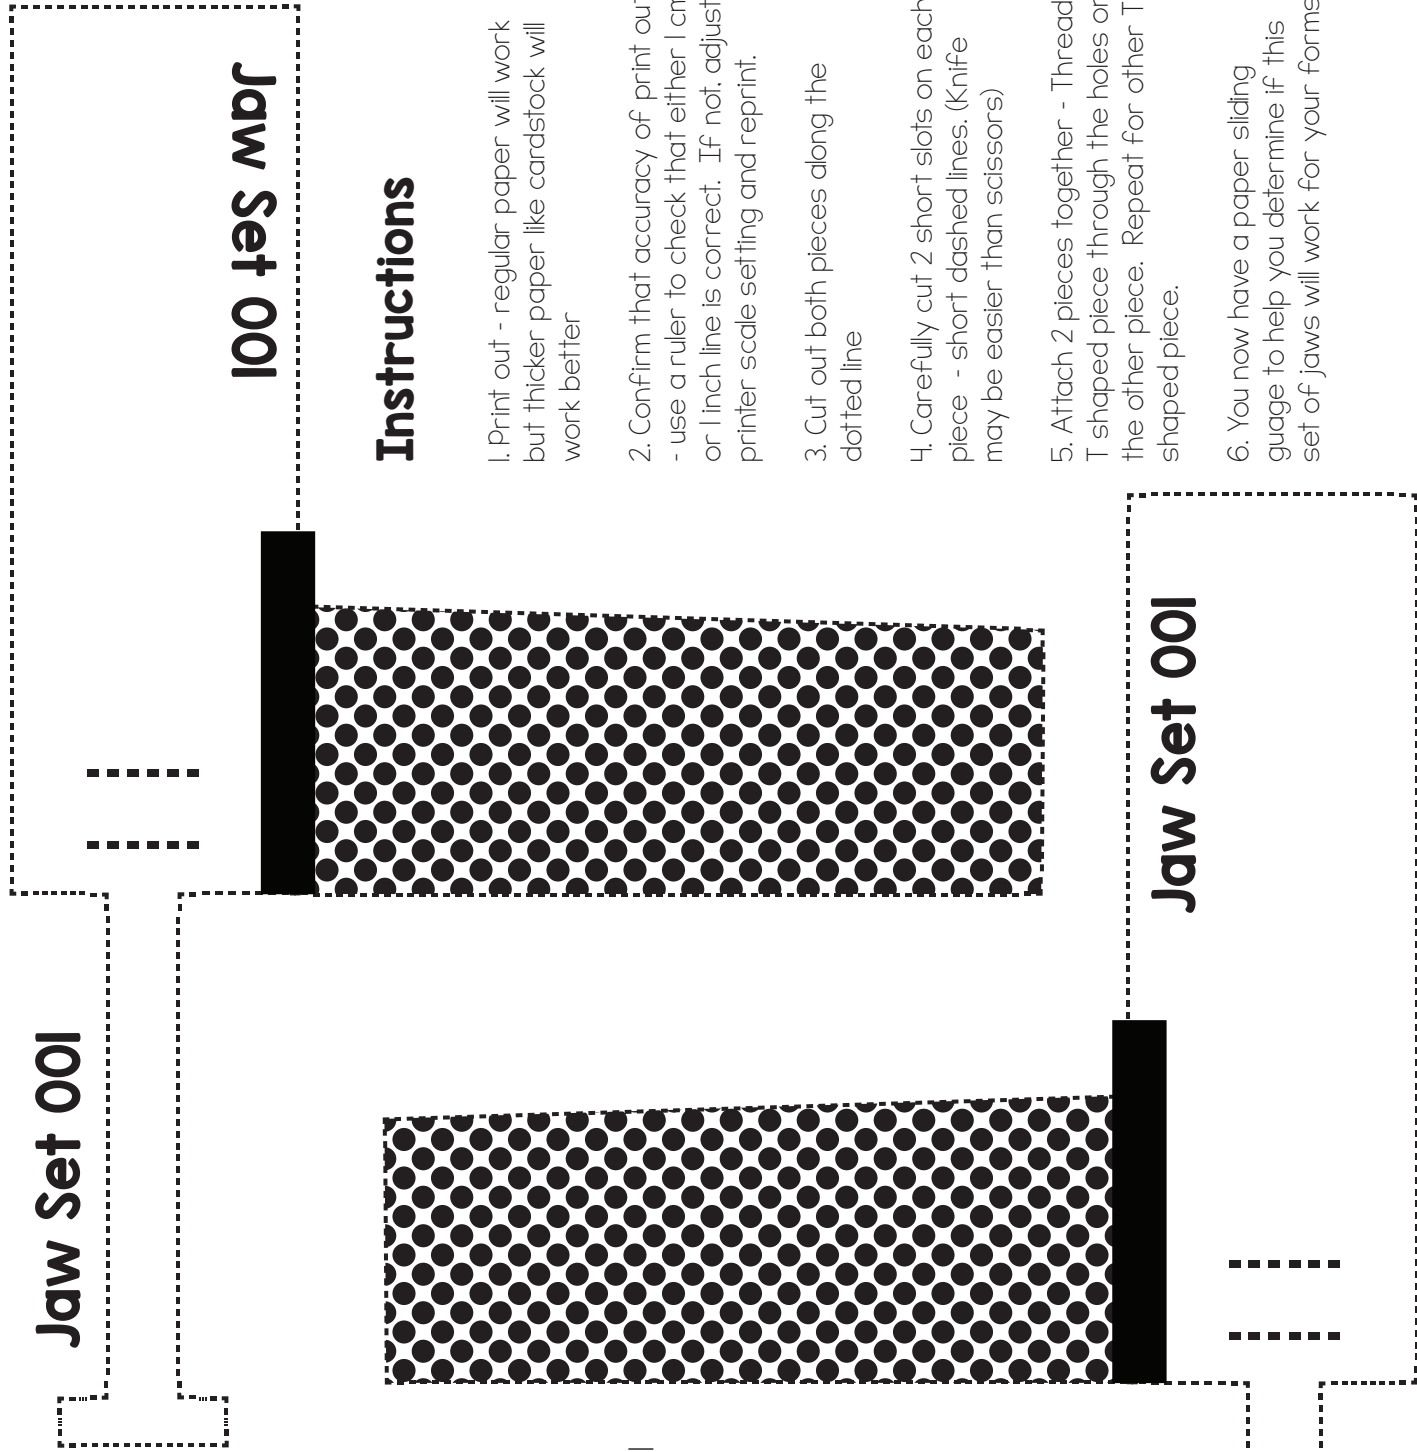

Which set of Jaws is right for your pots?

Use these paper templates to
determine which set of jaws will
work best for your forms.

Head to [kattilynbrennan.com/
potteryclamp](http://kattilynbrennan.com/potteryclamp) to see a video of
how to assemble and use this
paper sliding guage

1 cm | 1 inch

Instructions

1. Print out - regular paper will work but thicker paper like cardstock will work better
2. Confirm that accuracy of print out - use a ruler to check that either 1 cm or 1 inch line is correct. If not, adjust printer scale setting and reprint.
3. Cut out both pieces along the dotted line
4. Carefully cut 2 short slots on each piece - short dashed lines. (Knife may be easier than scissors)
5. Attach 2 pieces together - Thread T shaped piece through the holes on the other piece. Repeat for other T shaped piece.
6. You now have a paper sliding guage to help you determine if this set of jaws will work for your forms.
